

Title	Project on Middle East
College	Oakland Community College
Duration	2019-2023

Objectives and Potential Impact:

Overall, our efforts toward global education seek to help students see the world from different perspectives; navigate cultural difference with curiosity, empathy and humility; and develop the knowledge, skills, and attitudes one needs to succeed in a connected world. The MIIE grant will help greatly in strengthening our current efforts and exploring new and better ways of bringing the world to our students.

We anticipate achieving the following objectives over the course of the grant:

- At least 400 students (20 students x 20 sections) of Academic Literacy I and II, reading and writing about issues pertaining to a particular area of the globe each year such as the Middle East, Central America, and Asia
- At least 150 students, staff, and faculty attending a campus presentation on a global issue each fall and each winter, for a total of 8 presentations reaching over 1000 attendees in the upcoming four years
- At least 20 faculty and staff participating in professional development workshops each semester, with workshop topics relating to infusing globalism into the curriculum, understanding different cultures, working with students of different nationalities, and understanding global needs of and opportunities in our surrounding communities.
- At least two faculty being trained each year to teach the new interdisciplinary Global Studies courses currently in the very early stages of development.
- At least 10 students completing a service-learning project each semester, with a globally focused local organization.

Community College Project Team:
