

Title	Project on Latin America
College	Sinclair Community College
Duration	2019-2024

## **Objectives and Potential Impact:**

Sinclair Community College appreciates this opportunity to support international education programming. This project will strengthen international curriculum, intercultural programming, and mentoring at Sinclair Community College. The project team will develop a short term certificate program in International Business and new intercultural case studies for dissemination in multiple business and geography courses. The new curriculum will focus on Latin America. An advisory council with members from organizations such as the Dayton Council of World Affairs and the Dayton Hispanic Chamber of Commerce will advise on curriculum development and intercultural programming. The curriculum developed under this project, which includes two new courses and four new case studies, will be available as an Open Education Resource (OER) at no cost to students or the public.

This project will expand mentoring for international students through partnerships with local businesses and organizations. Throughout the grant period, Sinclair will host programming on international business practices with local business leaders. Panels with business leaders will discuss topics such as: international business practices, comparative economic systems, and corporate social responsibility in developing economies. The project activities will culminate in an International Business Symposium, held in Year 4, to showcase the international business community in the Dayton region.
